### SlipNOT® Slip Resistant Galvanized Grip Grate® Transforms Slippery Hydrolab at Tyco Fire Suppression & Building Products

Company: Tyco Fire Suppression & Building Products

Location: Marinette, WI

Industry: Commercial

Number of Employees: 3,000

Website: [www.tyco-fire.com](http://www.tyco-fire.com)

*Tyco Fire Suppression & Building Products (Tyco) works globally to protect people and properties through fire suppression technologies, piping installations and support systems. Tyco is devoted to setting a standard for the suppression of fire and special hazards for industrial and commercial settings. Safety is very important to Tyco, which is why their slick drainage areas needed to be covered with slip resistance.*

#### **The Situation:**

An engineering technician at Tyco Fire Suppression & Building Products contacted **SlipNOT®** about the different areas in their Hydrolab building. The flooring in this area is often slick and covered in foam. To prevent slips and falls, a corrosion resistant surface that allows for drainage was required.

#### **SlipNOT® Project Summary**

- **SlipNOT®** provided galvanized grating in sizes 2-1/2" x 3/16" x 25-1/8" x 64-3/4", 2-1/2" x 3/16" x 25-1/8" x 64", and 2" x 3/16" x 19-3/16" x 71-3/4" for their installation.
- The grating created a slip proof solution to areas often covered in water, grease and other substances.

### ***The Solution:***

**SlipNOT®** provided Tyco Fire Suppression & Building Products with galvanized grating in sizes 2-1/2" x 3/16" x 25-1/8" x 64-3/4", 2-1/2" x 3/16" x 25-1/8" x 64", and 2" x 3/16" x 19-3/16" x 71-3/4" for their installation. The pieces were cut-to-size which allowed Tyco Fire Suppression & Building Products to easily fit them in the current spaces. The steel was galvanized to prevent corrosion, which can happen when bare steel is exposed to water and foam.

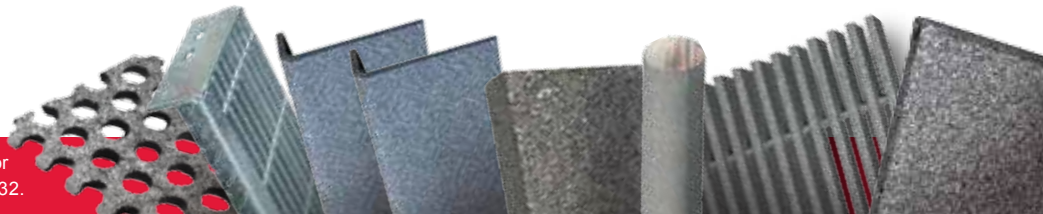

### ***The Impact:***

**SlipNOT®** provided the most effective way for Tyco Fire Suppression & Building Products to keep their employees safe while working in a slick environment. The galvanized steel grating has proven to be durable and long lasting, even in wet environments. The slip resistant coating allows for employees to walk on the grating without concern of it being too slick, while the grating allows for proper drainage from the Hydrolab.
