### Steel Plates Installed on Industrial Turntables at Airfloat

Company: Airfloat

Location: Decatur, IL

Industry: Manufacturing

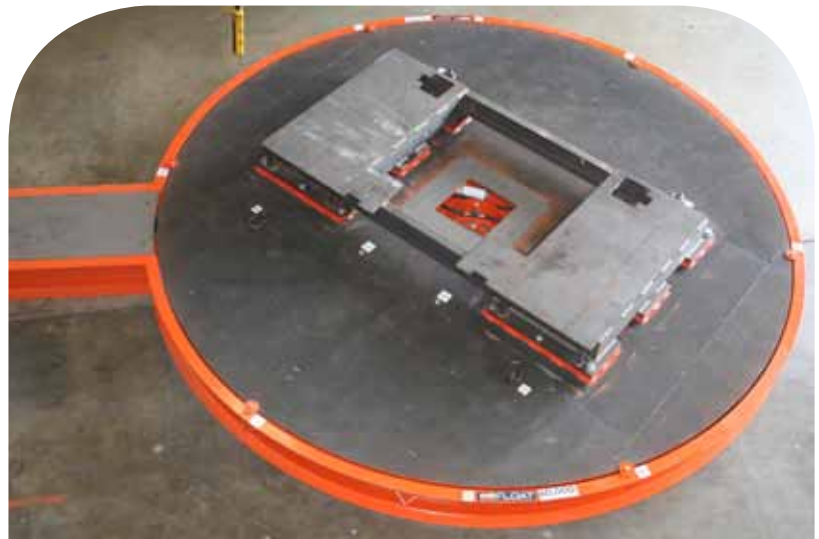

Employees: 50

Website: [www.airfloat.com](http://www.airfloat.com)

*Since 1967, Airfloat has been a proven leader in providing engineering solutions through air bearings technology to a diverse range of industries. For over 40 years, Airfloat's prominent motive is to move heavy loads within plant operations. Market leaders including Boeing, Ford Motor Company, and Caterpillar have used Airfloat technology to revolutionize their manufacturing process. Airfloat's 50 employees, including ten engineers, work together to reach one common goal: Implement the best solution, on the best schedule, at the best price.*

#### **The Situation:**

Airfloat is based in Central Illinois and works with multiple industries to create material-handling solutions for loads requiring frictionless, omnidirectional movement to products weighing more than 150 tons. Airfloat offers full service engineering, in-house manufacturing and field support services. From standard air skids and platforms to custom-designed and built floating assembly lines, Airfloat helps market leaders revolutionize their manufacturing processes. Airfloat wanted to provide a slip resistant option for their customers, so they contacted **SlipNOT®** Metal Safety Flooring for advice.

#### **SlipNOT® Project Summary**

- 14 pieces of 3/8" x 5' x 10' Grade 2 painted black steel plates
- **SlipNOT®** provided Airfloat with slip resistant steel plates which were installed on industrial turntables and flush-floor tables.

### ***The Solution:***

**SlipNOT®** provided Airfloat with 14 pieces of 3/8" x 5' x 10' Grade 2 painted black steel plates. **SlipNOT®**'s non slip steel plates were easily installed on Airfloats industrial turntables and flush-floor tables. A purchasing manager at Airfloat states "one of our largest customers requires **SlipNOT®** to be used on every table we build for them, citing safety as the primary reason. Customers appreciate the added safety and peace of mind offered by the product."

**SlipNOT®** has installed non slip steel plates on similar applications such as A&A Metal Products. The plates retrofitted around machinery, providing full surface traction for employees. A fabrication manager had said our product has been in their facility for the last 15 years and is still holding up really well.

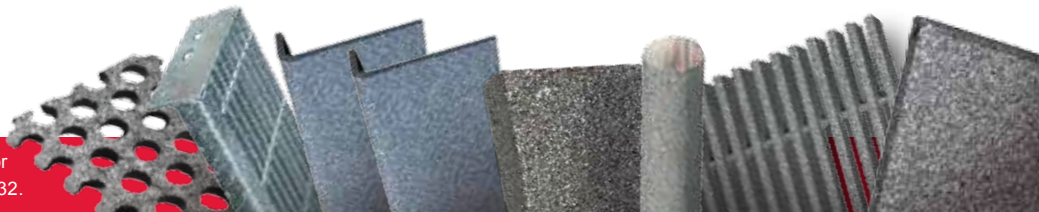

### ***The Impact:***

Airfloat appreciated the high-end appearance and durability of **SlipNOT®**. Airfloat refurbishes many of the products they sell and often after years, or even decades of field service, **SlipNOT®** always comes back looking and performing great.
