### Slip Resistant Steel Ladder Rung Covers for Marathon Oil Corporation Facility

Company: Marathon Oil Corporation

Location: Inver Grove Heights, MN

Industry: Oil and Gas

Number of Employees: 10,000

Website: [www.marathon.com](http://www.marathon.com)

*Marathon Oil Corporation is headquartered in Houston, TX. The company supplies oil to roughly 6,000 gas stations in the United States and has product facilities throughout the country to support its operation. At a production facility in Minnesota, ladders were becoming slick during production due to oil and lubricants. Marathon contacted SlipNOT® for a solution to their slick ladder rungs that would be able to withstand the production facility environment while providing a quick and efficient solution.*

#### **The Situation:**

Marathon Oil Corporation is a leader in the oil and gas industry with operations across the world. The American based oil and natural gas company operates four segments of business including: explorations and production, oil and mining, integrated gas and refining, and marketing and transportation. Marathon focuses on business values that include social responsibility and environmentally safe practices that help benefit people worldwide. Marathon partners with other countries to help promote business growth and health practices.

#### **SlipNOT® Project Summary**

- Steel ladder rung covers
- SlipNOT® steel ladder rung covers provided Marathon with a slip resistant solution that could be quickly installed to provide immediate protection for employees.

To continue to promote safety within the company, Marathon was seeking a replacement for slippery ladders in their production facility. The ladder rungs often became slippery from water, oil and lubricants and became extremely hazardous to employees.

***The Solution:***

Marathon contacted **SlipNOT®** Metal Safety Flooring for a solution to their existing slippery ladder rungs. **SlipNOT®** provided slip resistant steel ladder rung covers as the optimal solution for the application. Steel was the best choice because it is an extremely durable and long lasting material; the steel ladder rungs covers will withstand harsh working environments and remain slip resistant against heat, oil and water. Slip resistant steel ladder rung covers also require minimal maintenance while providing years of slip resistant protection. Steel ladder rungs can be easily welded into place, come pre-fabricated in stock sizes, or can be cut to specific lengths. The steel ladder rung covers were easily retrofitted over the existing slippery ladder rungs providing Marathon with a quick and permanent slip resistant solution.

***The Impact:***

**SlipNOT®** slip resistant steel ladder rung covers provided Marathon with an efficient and permanent solution to improve safety on existing ladders. Slip resistant ladder rungs are extremely durable and long lasting and will help Marathon workers utilizing the ladders work safely and efficiently.
