Liberty Mutual survey shows 61% of executives say $3 or more is saved for each $1 invested in workplace safety.

The American Society of Safety Engineers calls investment in improving workplace safety “a sound business strategy” with a “positive impact on the financial bottom line.”

Companies that implement effective safety and health programs can expect reductions of 20% or greater in their injury and illness rates and a return of $4 to $6 for every $1 invested. Liberty Mutual survey shows 61% of executives say $3 or more is saved for each $1 invested in workplace safety.

SlipNOT® metal products exceed all recommendations for coefficient of friction and slip resistant surfaces as specified by ANSI, ASTM, NFPA, ADA, and OSHA.

SlipNOT® is an all metal slip resistant surface. The SlipNOT® process consists of applying molten metal to metal substrates by plasma spray deposition, resulting in a file hard random stacked hatch matrix covering 100% of substrate surfaces. SlipNOT®’s unparalleled surface hardness is combined with a maximum bond strength producing the most durable, longest lasting slip resistant surface available.

$70 BILLION SPENT ANNUALLY IN COMPENSATION & MEDICAL COSTS ASSOCIATED WITH EMPLOYEE SLIP AND FALL ACCIDENTS ACCORDING TO THE NATIONAL SAFETY COUNCIL.

WHAT IS SLIPNOT?

Benefits of added workplace safety:

OSHA:

1. Companies that implement effective safety and health programs can expect reductions of 20% or greater in their injury and illness rates and a return of $4 to $6 for every $1 invested.
2. Liberty Mutual survey shows 61% of executives say $3 or more is saved for each $1 invested in workplace safety.
3. The American Society of Safety Engineers calls investment in improving workplace safety “a sound business strategy” with a “positive impact on the financial bottom line.”

BENEFITS

► Reduces liability - safer and more productive work areas
► Exceeds - all regulatory agency recommendations for slip resistance
► Long lasting - surface with a hardness of over 55 on the Rockwell "C" scale
► Durable - with a surface bond strength of over 4,000 psi
► Economical - durability and longevity result in significant life-cycle cost savings
► Versatile - can be fabricated to meet project needs
► Slip resistance - SlipNOT® is a high traction surface, with a coefficient of friction of 0.85 or higher. Coefficient of friction values depend on test method, sensor, and environmental conditions.
